

# Coriphol

**100% Organic**  
**Distilled from California Almond Shells**  
**For Foliar and Drip Applications**

**For use in soil and foliar applications**  
**265 U.S. GALLONS (1000 L)**

Pyroligneous acid may enhance plant growth.  
For use on organic and conventional crops and horticulture including vegetables, fruit & nut trees, grains, scrubs, flowers and turf.

*(These are general use guidelines and may be adjusted as needed.)*

Soil Pretreatment - Dilute with water to a ratio of 1:100 and spray onto soils to achieve 2-4 inches of penetration. Wait 2-weeks before planting.

Seedlings & Growing Plants - Dilute with water to a ratio of 1:300 to 1:1000 for foliar spray or drip/root irrigation. Repeat every 2-3 weeks.

Spraying is best done in morning or evening conditions. If it rains within 24-hours of use, the application should be repeated after the plants have dried.

Avoid use during flowering stages.

Don't use in combination with alkaline pesticides.

*Tightly reseal the container and store at room temperature out of direct sunlight.*

15% pyroligneous acid produced from almond shells  
pH 2.5-3.3  
Density: 1.01 g/ml  
Acetic acid equivalent: 5.1%
